

Power-Rib™ Panel

Elixir Industries is a leader in metal fabrication. Because of this marketplace position, we have amassed valuable metal fabrication experience and exceptional product quality, both of which is evident in our Power-Rib™ panel product. The universal design of the Power-Rib™ panel expresses the rich architectural traditions of board and batten beauty. Combining the looks with the strength of 26 and 29 gauge*, full hard, high tensile steel provides superior resistance to wind and snow load capacities to meet the needs of any building product.

* Contact Local Divisions for Available gauges
